

We Focus on Doing Chemistry!

Our broad spectrum of services include Custom synthesis, Small lots manufacturing, Contract R&D, Route selection, Process research/scale-up, Analytical development, and Impurity isolation, identification & synthesis. We also provide cGMP services and have a Schedule II – V Controlled Substance License. Our staff is composed primarily of Ph.D. chemists who work from literature, patents, notebook procedures or structures on a gram to 10's of kilograms scale. In addition, we maintain a QA/QC staff and Regulatory support. Our results are a technology package that is safe, operable, economic, and includes consideration of your environmental goals while delivering high quality products.

Chemo Dynamics has the experience and a wide array of novel equipment to deliver R&D quantities to 10's of kilograms of most organic compounds. With our help, you can develop your product line and minimize the time to market. For additional information, contact:
